

CUSTOM FALL PROTECTION SOLUTIONS MADE EASY

We pair education and expertise to protect your people, providing complete engineered fall protection systems - including design, installation, equipment, training and annual inspections.

HySafe®

HYSAFE IS ENGINEERED FALL PROTECTION

Our comprehensive approach ensures every project meets your exact needs for safety, efficiency, affordability and compliance.

At HySafe, we are passionate about custom fall protection. We design, engineer and install systems when off-the-shelf solutions aren't enough.

Complex? Bring it on. Our team is ready to tackle your toughest challenge. Through dedicated support, training and a robust recertification program, we build more than engineered fall protection. We build long-term partnerships.

OUR PROCESS

When you need a complete system or a custom component, count on us.

ASSESS: A HySafe partnership begins with a full assessment of your needs.

DESIGN: Qualified experts design fall protection solutions tailored just for you.

ENGINEER: HySafe connects you with solutions that meet or exceed industry standards.

INSTALL & TRAIN: Dedicated HySafe experts install your system and train your employees.

RECERTIFY: HySafe recertification makes it easy to ensure you are always in compliance.

FALL PROTECTION SYSTEMS

A full range of engineered systems with options for every application.

Employers need assurance that their operations will keep workers safe. Employees deserve fall protection that keeps them both safe and comfortable while allowing them to get the job done efficiently. Too often, a system that meets the needs of both employees and employers isn't available off the shelf.

Our experts provide a range of solutions from fall arrest to passive fall protection systems. With HySafe, you can trust that everyone who works at height at your facility has the exact system they need to go home safely each day.

- **CABLE LIFELINE**
More flexibility for access and freedom of movement
- **RIGID RAIL**
Continuous movement and shorter fall arrest needs
- **PORTABLE**
Adjustable solutions for safe temporary access
- **PASSIVE**
A higher level of safety from gates to guardrails
- **LADDER**
Fixed protection for climbing high-risk structures
- **CONFINED SPACE**
Safe access and mobility in hazardous spaces
- **ROOFTOP**
Options covering roofs of every angle and material
- **CUSTOM**
Engineered to your exact specifications

FALL PROTECTION EQUIPMENT

A selection of top-quality equipment to complement your system.

Your engineered system is only as strong as the equipment used to build it. Whether you need your current equipment inspected, new equipment for your existing system or a complete custom solution, our experts can connect you with the exact equipment you need - anchors, harnesses, lanyards, self-retracting lifelines, rescue gear and accessories to ensure you have a solution that fits.

RECERTIFICATION SERVICE

Keeping you free from liability and your workers free from harm.

COMPLIANCE: The easy way to meet all applicable industry standards

PROTECTION: Regular inspections increase worker safety at height

MAINTENANCE: Proactive upkeep and on-site repairs prevent accidents

ANSI AND OSHA STANDARDS REQUIRE ANNUAL INSPECTION: Our experts certify every system we install and can recertify systems whether we installed or not. Plus, our team can provide a 5-year engineering design review to maintain compliance under changing conditions. We take care of it all, right down to the free recordkeeping.

INDUSTRIES WE SERVE

The HySafe team has the expertise to deliver custom solutions to every industry, including yours.

HySafe's expertise is the result of successful partnerships in the industries most impacted by at-height safety. With over 150 years of industry-specific expertise, we are the partner you can trust to deliver custom fall protection solutions for your industry. We understand the challenge our clients face when confronted with the often complex task of implementing a fall protection system.

Each industry is distinct and the best solution isn't always available off-the-shelf. HySafe's consultative approach to turnkey fall protection ensures that every project meets the client's exact needs for safety, efficiency, value and compliance.
