

# CASE STUDY

## MJM YACHTS OVER-HEAD RAIL SYSTEM

### SITUATION

- MJM Yachts needed a fall protection solution
- Workers required flexibility and comfort while performing tasks on yacht fiberglass
- Installation had to minimize disruption to operations—shutdown was not an option
- Multiple areas required attention for comprehensive safety coverage

### ACTION

- Conducted preconstruction visits to assess the project scope
- Installation was completed in sections to prevent operational shutdowns
- Created safe working environment before, during, and after project completion
- Installed a sleek, low-profile Safety Link overhead rail system and single point anchors

### RESULT

- Provided a system that offered both flexibility and an unobtrusive design
- Customer was highly satisfied with the solution
- Reinforced HySafe's position as the premier fall protection provider for yacht manufacturers
- Hysafe's exceptional performance is paving the way for future partnerships
