

PERMANENT ACCESS SOLUTIONS

HySafe®

ANCHORS | DAVITS | OUTRIGGERS | PLATFORMS | MONORAILS | INSTALLATION

COMPLETE PERMANENT ACCESS SOLUTIONS MADE IN THE U.S.A.

Reliable, high-performance access systems designed for efficiency and durability

Bee Access designs and manufactures a full portfolio of permanent equipment. Our high-quality products are supported by in-house engineering to solve your complex access challenges. Every solution is custom-built to precisely align with your project scope.

Roof Anchors • Wall Anchors • Flush Anchors

Anchors provide secure tie-off points for fall protection or suspended scaffold tiebacks. Permanently installed systems transfer loads to the structure and can be bolted to concrete, mounted to structural members or embedded into concrete.

Bottom & Top Rotating Davits • Pedestals & Adapters • Sockets

Davits support suspended access equipment, either temporary or permanent. Sizes are customized based on parapet height, site conditions and access needs, with options for roof-launched or ground-rigged platforms.

Workcage, 2 & 4 Line Powered Platforms

Permanently installed powered platforms are customized to the building, with integrated controls, safety systems and all required accessories. The type of platform required is dictated by factors such as building location, rigging and height.

Exterior/Interior Monorails

Monorail systems are custom designed to follow a building façade, ideal for recessed or overhanging areas, sloped roofs, cantilevers and atriums. Powered or manual trolleys move along the rail to provide mobile rigging points for suspended platforms.

Outrigger Beams • Backfed Beams • Rigging Sleeves

Outriggers are an alternative option for supporting suspended platforms with re-positionable options that are secured to permanent stands or anchors. Push-thru options are also available when access is needed through the building's facade.

TURNKEY PERMANENT EQUIPMENT INSTALLATION SERVICES

From assessment and design through installation, testing and training, HySafe is your on-site partner

In partnership with Bee Access, our experts ensure every system meets OSHA and ANSI standards, with ongoing inspections, maintenance and recertification to keep your equipment safe, compliant and ready for use.

WHY PARTNER WITH HYSAFE?

Complete Turnkey Solutions

From initial assessment to final installation, HySafe manages every phase for a seamless experience.

Expert Design & Engineering

Tailored systems designed to meet your building's exact façade access and fall protection requirements.

Compliance Assurance

All installations meet OSHA and ANSI standards, reducing risk and ensuring regulatory adherence.

Ongoing Inspections & Recertification

Regular evaluations and documentation keep systems safe, compliant and operational.

Full-Service Support

Testing, training, maintenance & repairs—so your team can operate with confidence and peace of mind.

ABOUT US

FALL PROTECTION MADE SIMPLE.

Your dedicated partner for compliant, custom-engineered fall protection – without the complexity.

At HySafe, we believe fall protection doesn't have to be complicated. For over 25 years, we've made it our mission to take the complexity out of keeping workers safe at height, handling every detail so you can focus on running your business.

Working at heights is demanding enough. That's why our team is dedicated to making fall protection easier - serving clients across North America in a wide range of markets and applications. From site assessment and custom system design to installation, recertification, and training, no fall protection challenge is too big to handle.

HySafe is your single-source partner, keeping you compliant year after year and making sure every worker goes home safely.
